## **Global Citizenship Seminar 2**

CUNY

April 23 – 30, 2016

### **Session Description**

The Global Citizenship Seminar is a program offered by the Global Citizenship Alliance (GCA) that – in association with the Salzburg Global Seminar – provides and promotes global citizenship education in cooperation with a variety of individual and institutional partners. Global citizens are people who have developed the knowledge, skills, tools, values, and commitment to:

- Understand the nature of globalization, including its positive and negative impacts around the world, and realize how it is transforming human society
- Appreciate the diversity of humanity in all of its manifestations, from local to global, and interact with different groups of people to address common concerns
- Recognize the critical global challenges that are compromising humanity's future and see how their complexity and interconnections make solutions increasingly difficult
- Collaborate with different sets of stakeholders, by thinking globally and acting locally, to resolve these critical challenges and build a more equitably sustainable world

Broadly speaking, global citizens are consciously prepared to live and work in the complex interdependent society of the 21<sup>st</sup> century and contribute to improving the common global welfare of our planet and its inhabitants.

### **SEMINAR OVERVIEW**

In an age of globalization which increasingly brings people in contact with other cultures as a result of changing social, political, and economic activities and technological advances, the need to understand international affairs, to recognize cultural values other than our own, and to understand world events from a variety of perspectives, has become increasingly critical. So has the need for people to think and act as global citizens in order to address some of the most pressing issues of global concern that are facing humanity in the 21<sup>st</sup> century.

The purpose of this program is to provide an intensive seven-day international experience that will allow participants to develop a better understanding of the processes and affects of globalization and to explore pressing issues of global concern from a variety of perspectives. Participants should leave with a better understanding of what it means to be a global citizen, why it is important, and how the core values of global citizenship can be incorporated into ones present and future actions. At the end of the session it is intended that

participants will have the desire, ability and empowerment to envision and affect positive change on their own campuses and in their local and global communities.

Because of the importance of the United States as a global actor and the Global Citizenship Alliance's venues in Europe, the seminar will pay special attention to the political, economic and cultural history of the transAtlantic relationship, its future dimensions, and the impact such changes may have on the rest of the world. At the same time, mindful of increasing global interconnectedness, the seminar will consider issues of particular concern to regions of the developing world. In this way, the seminar will formally address issues related to the relationship between the historical legacy of the latter part of the 20<sup>th</sup> century, global responsibility, humanitarian intervention, social justice, and sustainable development.

Knowing that we cannot formally address all of the important issues related to global citizenship or all of the topics of particular interest and concern to those participating in the seminar, ample time is available during plenary discussions, informal conversations, small group work, and other formats for participants to raise, discuss, and address topics that are not formally listed in the program. The international teaching faculty, faculty advisors from partner institutions, and GCA team are available to engage in these conversations throughout the week.

### PEDAGOGICAL MODULES

Plenary Lectures: *Understanding the Contemporary World.* Teaching faculty will deliver these lectures to the entire student group. Lectures will generally last for about 45 minutes, followed by a half-hour coffee break, after which a discussion of the lecture will resume. The discussion portion will be a mix of questions and answers, student or faculty panels, and group exercises.

Small Group Work: Throughout the course of the week, students will break into small groups to explore a specific topic related to globalization and global citizenship in depth. More information about the specific focus of the group work will be distributed in Salzburg.

Cultural Exchange: This section of activities will seek to expose students to diverse international views about American politics and culture by introducing them to other opinions, cultural values and historical legacies. Activities may include a concert of classical music, offsite visits to Salzburg and other local historical sites, like the Dachau Concentration Camp Memorial near Munich.
